GREY WATER SYSTEM
OASIS

rainwater harvesting

stormwater detention

greywater recycling

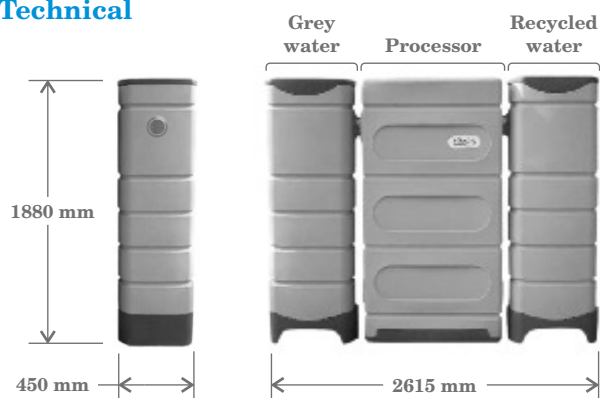

The Oasis GT600 gives you control of your greywater and reduces your dependence on our fragile natural water resources. Capable of treating an average household's greywater, the Oasis uses the latest high performance technology to produce clean, recycled water.

Quiet and safe, the Oasis GT600 uses up to 40% less energy than inferior systems without any of the unpleasant odours. Its compact and modern design means it fits well anywhere around the home including under the roof eaves and in the garage. Azuratec offer a variety of tank options including SlabTanks™, the hidden and modular tank system to ensure you have adequate storage for your recycled water.

Features and Benefits

- Above ground installation - no excavation
- Treats laundry, shower, bath and basin water
- Recycled water is suitable for clothes washing, the toilet, garden watering and car washing
- Biological treatment - no chemical addition
- Includes ultraviolet (UV) disinfection process
- Fully automatic - no intervention by the user
- Can be remotely monitored
- Integrates with rainwater harvesting systems
- Can recycle the greywater of up to eight people

Technical

Installation

- Meets the wheelbarrow test - fits down the side of the house and with no need for excavation
- Plumbing to and from the Oasis is kept separate from your mains water plumbing
- Excess greywater is automatically diverted
- Installation can be completed in less than a day
- All plumbing and electrical work is carried out by licensed practitioners only
- Additional tanks can be installed to store the recycled water including the SlabTank hidden system

The Process

- Pre-screen removes lint and coarse materials to prevent blockages and fouling of the system
- Water flows down through proprietary media
- Contaminant removal is achieved through filtration, absorption and biological treatment
- Ultraviolet (UV) disinfection completes the treatment before water is stored for recycling

Azuratec provide fast and simple residential water systems to suit modern building practices.

Our products include rainwater harvesting, stormwater detention and greywater recycling. We take responsibility for installation to ensure quality and save our customers from the usual hassle and delay.

We support our customers with professional design and engineering services to take the stress out of achieving regulatory compliance.
