slabtank®

hidden water storage

rainwater harvesting

stormwater detention

greywater recycling

Azuratec SlabTanks are the 2008 HIA-Boral GreenSmart Awards winner in the category of HIA GreenSmart Product of the Year. Now featuring improved access, they've been granted the Smart Approved WaterMark.

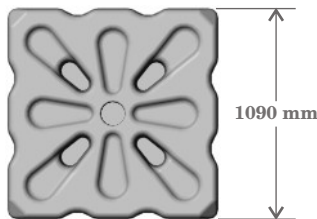

SlabTanks were designed by a builder ... for builders and their customers ... so they don't require deep holes or shoring which are often costly, messy and cause interruptions to the building site and risk workplace safety. Choose from standard system configurations or modify the storage capacity, pumping and filtration options to suit. SlabTanks are modular, accessible and hidden so they don't occupy valuable backyard space.

Features and Benefits

- storage for rainwater and recycled greywater
- fit seamlessly into a waffle slab or raft slab
- hidden and don't take up valuable real estate
- no delays, deep holes or special excavation
- compliant with relevant building regulations
- installed on the day the slab is being set up
- ideal for the garage, patio or driveway

Technical

SlabTanks are designed to fit into a waffle slab or raft slab so they are the same size as a standard 300mm foam waffle pod.

17 kilograms
250 liters minimum
Food grade polymer
UV stabilized

Installation

Step 1

SlabTanks are connected together amongst the foam waffle pods or sand forms of a house slab or driveway.

Step 2

Reinforcement bar/mesh is laid as normal allowing for access ports on the tops of some of the tanks.

Step 3

Concrete is poured and levelled as normal and the tanks are treated like foam waffle pods.

Step 4

After lock-up, the pump, filtration and switching is installed and the system is tested and ready for use.

Azuratec provide fast and simple residential water systems to suit modern building practices.

Our products include rainwater harvesting, stormwater detention and greywater recycling. We take responsibility for installation to ensure quality and save our customers from the usual hassle and delay.

We support our customers with professional design and engineering services to take the stress out of achieving regulatory compliance.
